

Code Cracker

India is a country full of ancient history and ancient culture.

Ash, like his Uncle Vik, is fascinated by the history, and this is what draws his uncle to Lord Savage.

Without archaeologists and the artefacts they uncover beneath the earth, we would be unable to know as much about the past as we do now. Like pieces of a puzzle, pieces of history can be put together by the different clues archaeologists find.

However, Lord Savage's reasons for finding out about the past were more sinister. He wanted Uncle Vik to crack the code to where the aastra was hidden so he could use it to unlock the Iron Gates and release the prisoner Ravana. In thanks, Ravana would grant Lord Savage immortality.

Ancient Egyptians used hieroglyphs to create their language, but it is Harrapan, one of the ancient languages of India, that holds the key to the Iron Gates.

Imagine the code below is Harrapan.

\leq	\div	Σ	Ψ	\pm	\leq	\hat{a}	∞	€	Ɔ	β	\times
a	b	c	d	e	f	g	h	i	j	k	l
μ	α	ζ	σ	π	ω	γ	υ	φ	3	δ	Γ
m	n	o	p	q	r	s	t	u	v	w	x
θ	ϕ										
y	z										

Can you translate the text below?

$v \infty \pm$ $\Psi \pm \mu \zeta \alpha \gamma$ $\delta \text{€} \times \times$ $\omega \pm \upsilon \varphi \omega \alpha$

~~~~~
